FUND OBJECTIVE

Seeks total return through current income and, secondarily, capital appreciation. The Fund pursues this objective through investment in a diversified portfolio of investment-grade corporate debt obligations and obligations issued or guaranteed by the U.S. government, its agencies or instrumentalities.

BOND FUND UPDATE

The economy's year-end momentum has carried over into the first quarter of 2024, and recent economic data shows that the US economy is not moving quickly toward recession. Higher than expected inflation and employment figures pushed consensus expectations of rate cuts to later in the year.

The Federal Reserve (Fed) left the target federal funds rate unchanged at 5.25%-5.50% at both its January and March meetings. Core Personal Consumption Expenditures (PCE), the Fed's preferred inflation measure, eased to 2.80% year-over-year in February, down sharply from the 4.80% rate a year ago. Employment remained healthy with non-farm payroll growth registering over 200,000 jobs in both January and February. Committee members and the bond market shifted rate cut consensus expectations from six to a total of three, with the first cut expected in July. The Fed needs to see inflation moving sustainably toward 2.00% before they begin cutting.

Treasury bonds sold off over the first quarter with yields increasing approximately 25-40 basis points in the intermediate part of the curve. The yield on the 10-year treasury increased 32 basis points to end the quarter at 4.20%.

For the first quarter, the Commerce Bond Fund's return of -0.19% outperformed the Bloomberg Aggregate Bond Index return of -0.78%. An underweight allocation to agency mortgage-backed securities contributed to performance. An underweight allocation to agency debentures detracted from performance.

Falling job openings, a slightly rising unemployment rate, and an expected slow-down in consumer discretionary spending are developing headwinds for the economy. Still, the Fed forecasts Gross Domestic Product (GDP) growth of 2.80% for the first quarter of 2024, and market consensus is for a full-year growth rate of 2.20%.

TOTAL RETURNS (%) AS OF 3/31/24

Lipper Category: Core Bond Funds

* Returns for periods over one year are annualized. The returns represent past performance. Past performance does not guarantee future results. The Fund's investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted above. NOTES

1. The Net Asset Value represents the assets of the Fund (ex dividend) divided by the total number of shares.
2. Duration is the method of determining a bond's price sensitivity, given changes in interest rates.
3. The Bloomberg US Aggregate Bond Index is an unmanaged index comprised of the Barclays Government/ Corporate Bond Index, Mortgage-Backed Securities Index and Asset-Backed Securities Index. The Index figures do not reflect any deduction for fees, expenses or taxes. It is not possible to invest directly in an unmanaged index.
4. The Lipper Category 2nd Quartile Total Return Ranking represents the lowest performing fund in the second quartile within the respective Lipper investment category.
5. Fund holdings and allocations shown are unaudited, and may not be representative of current or future investments. Fund holdings and allocations may not include the Fund's entire investment portfolio, which may change at any time. Fund holdings should not be relied on in making investment decisions and should not be construed as research or investment advice regarding particular securities. Current and future holdings are subject to risk.

This fund has not been rated by an independent rating agency. Commerce may receive credit quality ratings on the Fund's underlying securities from at least one of three major rating agencies - S&P, Moody's and Fitch. The underlying security may be unrated but deemed by Commerce to be of comparable quality. Commerce develops the credit quality breakdown by taking the highest rating if more than one agency rates a security. Commerce will use a single rating if that is the only one available. Securities that are not rated by the agency are reflected as such in the breakdown. Commerce converts all ratings to the equivalent S&P major rating category when illustrating the Fund's credit rating breakdown. Ratings and portfolio credit quality may change over time. Unrated securities do not necessarily indicate low quality, and for such securities the investment adviser will evaluate the credit quality.

Non-Rated (NR) includes holdings of securities not rated by any major rating agency. Unrated securities held in the fund may be of higher, lower, or comparable credit quality to securities that have a credit rating from a Nationally Recognized Statistical Rating Organization (NRSRO). Therefore, investors should not assume that the unrated securities in the fund increase or decrease the fund's overall credit quality. Percentages may not sum to 100% due to rounding.

6. The total annual operating expenses of the Funds, both current (net of any fee waivers or expense limitations) and before waivers (gross of any fee waivers or expense limitations), are as set forth above. In the case of the Value, Growth, Bond, Short-Term Government, National Tax-Free Intermediate, Missouri Tax-Free Intermediate and Kansas Tax-Free Intermediate Funds, the Adviser has contractually agreed to limit each Fund's total annual operating expenses (excluding interest, taxes and extraordinary expenses) until March 1, 2025. After that date, the Adviser or a Fund may terminate the contractual arrangement. A Fund's total annual operating expenses may increase without shareholder approval.
7. The method of calculation of the 30-Day Standardized Subsidized Yield is mandated by the Securities Exchange Commission and is determined by dividing the net investment income per share earned during the last 30 days of the period by the maximum public offering price of the Fund ("POP") per share on the last day of the period. This number is then annualized. The 30-Day Standardized Subsidized Yield reflects fee waivers and/or expense reimbursements recorded by the Fund during the period. Without waivers and/or reimbursements, yields would be reduced. This yield does not necessarily reflect income actually earned and distributed by the Fund and, therefore, may not be correlated with the dividends or other distributions paid to shareholders. The 30-Day Standardized Unsubsidized Yield does not adjust for any fee waivers and/or expense reimbursements in effect. If the Fund does not incur any fee waivers and/or expense reimbursements during the period, the 30-Day Standard Subsidized Yield and 30-Day Standardized Unsubsidized Yield will be identical.

A basis point (bp) is equal to 1/100th of 1%, or 0.01% (0.0001). For example: 1% change = 100 basis points, and 0.01% = 1 basis point.

Economic and market forecasts presented herein reflect our judgment as of the date of this presentation and are subject to change without notice. These forecasts do not take into account the specific investment objectives, restrictions, tax and financial situation or other needs of any specific client. Actual data will vary and may not be reflected here. These forecasts are subject to high levels of uncertainty that may affect actual performance. Accordingly, these forecasts should be viewed as merely representative of a broad range of possible outcomes. These forecasts are estimated, based on assumptions, and are subject to significant revision and may change materially as economic and market conditions change. Commerce has no obligation to provide updates or changes to these forecasts. Case studies and examples are for illustrative purposes only.

FOOTNOTES

Investments in fixed income securities are subject to the risks associated with debt securities including credit and interest rate risk. The guarantee on U.S. government securities applies only to the underlying securities of the Fund if held to maturity and not to the value of the Fund's shares. Mortgage-backed securities are subject to prepayment risks, which may result in greater share price volatility. Asset-backed securities may be less liquid than other securities and therefore more difficult to value and liquidate, if necessary. Foreign investments may be more volatile than investment in U.S. securities and will be subject to the risks of currency fluctuations and political developments.

*** The Total Returns are average annual total returns or cumulative total returns (only if the performance period is one year or less) as of the most recent calendar quarter-end. They are net of expenses and assume reinvestment of all distributions at net asset value. Because the Fund is not subject to a sales charge, such a charge is not applied to their Total Returns.**

** Lipper Analytical Services, Inc. is an independent publisher of mutual fund rankings, records rankings for these and other Commerce Funds for one-year, three-year, five-year, and ten-year total returns periods. Lipper compares mutual funds within a universe of funds with similar investment objectives, including dividend reinvestment. Lipper rankings are based on total return at net asset value and do not reflect sales charges. Lipper rankings do not imply that the fund had a high total return.

*** The Morningstar Rating™ is calculated for funds with at least a 3-year history based on a risk-adjusted return measure that accounts for variation in a fund's monthly excess returns. Exchange-traded funds and open-ended mutual funds are considered a single population. In each category, the top 10% = 5 stars, next 22.5% = 4 stars, next 35% = 3 stars, next 22.5% = 2 stars, and bottom 10% = 1 star. Overall rating is derived from a weighted average of the returns associated with its 3-, 5-, and 10-year (if applicable) rating, excluding all sales charges. Weights are based on the # of months of total returns: 100% 3-year rating for 36-59 months, 60% 5-year rating/40% 3-year rating for 60-119 months, and 50% 10-year rating/30% 5-year rating/20% 3-year rating for 120 or more months. ©2024 Morningstar, Inc.
